

SECOND WORLD CONGRESS

ULTRASOUND IN MEDICAL EDUCATION

SEPTEMBER 27 - 29, 2013

Plenary Sessions, Concurrent Sessions, and Panels

- Ultrasound as a core clinical competency in medical education
- Simulation in ultrasound – training and assessment
- E-learning in Ultrasound
- Advances in Ultrasound Technology
- Competency-based Medical Education: ultrasound as a model
- Teaching Anatomy with Ultrasound
- Teaching Physiology with Ultrasound
- Teaching the Physical Examination with Ultrasound
- Starting an Ultrasound Program (A to Z)
- Ultrasound Education: UGME, GME, and CME
- Developing a Consensus – Clinical Practice and Education
- Faculty Development in Ultrasound
- Pod-casting, iTunes, and other media
- Phantoms: from home grown to state-of-the-art
- Remote and Tele-Ultrasound
- Pre-hospital Ultrasound
- Critical Care Ultrasound
- Primary Care Ultrasound – all healthcare providers
- The Focused Cardiac Examination
- Lung Ultrasound
- Musculoskeletal Ultrasound
- Transcranial Doppler
- Pediatric Ultrasound
- OB/GYN ultrasound
- Ultrasound for the Surgeon
- GU Ultrasound
- Ultrasound First – accurate, safe, and cost effective
- Ultrasound Programs across the nation and around the globe
- Enhancing the Patient-Provider Relationship with Ultrasound
- Abstract Presentations

Interest Group Panels, Breakfast, and Networking

- Basic Science Educators
- Medical Students
- Residents
- Midwives
- Physician Assistants
- Emergency Medical Technicians
- Nurse Practitioners
- Clerkship Directors
- Residency Directors
- Directors of CME

Workshops

- Introduction to Ultrasound
- Introduction to ECHO
- Organs of the Abdomen
- Kidney and Urinary Bladder
- Lung Ultrasound
- Musculoskeletal Ultrasound
- Pediatric Ultrasound
- Basic OB/GYN Ultrasound
- Transcranial Doppler and Carotid Ultrasound
- Vascular – Aorta and Inferior Vena Cava
- Trauma- the Fast Exam
- Ultrasound to Teach Anatomy
- Ultrasound to Teach Physiology
- Ultrasound Guided Procedures
- Deep Venous Thrombosis
- Nerve Blocks
- Multi-system approach to the critically ill / trauma patient
- Hand-held Ultrasound Devices
- The One Probe Approach to Comprehensive Ultrasound
